WEB DEVELOPER

Motivated and detail-oriented web developer with foundational knowledge in HTML, CSS, JavaScript, and responsive web design. Eager to apply problem-solving skills and creativity to develop user-friendly websites and applications. Looking for a position to grow technical expertise and contribute to innovative projects in a collaborative environment.

KEY COMPETENCIES

JavaScript	Node JS	Strong interpersonal skills
HTML/CSS	PostgreSQL	Proactive and self-motivated
MySQL	Excellent communication skills	Exceptional organisational skills

---

PROJECTS EXPERIENCE

Chat Application Using React and Firebase

Developed a real-time chat application using React.js for the front-end and Firebase for authentication and database management. Implemented features such as user authentication, real-time messaging, and secure data storage. Leveraged Firebase Firestore for efficient data handling and integrated responsive design for seamless user experience across devices. This project enhanced my understanding of React components, state management, and cloud-based backend services.

Weather Application

Built a weather forecasting app using React.js for the user interface and integrated the OpenWeatherMap API for real-time weather data. The app allows users to search for current weather conditions based on city names, displaying temperature, humidity, and weather status. Designed with a responsive layout to ensure usability on both desktop and mobile devices. This project improved my skills in API integration, asynchronous JavaScript (fetch/async-await), and managing dynamic data in React.

To Do List Application

Developed a simple to-do list app using React.js for task management. Users can add and remove tasks, but the app does not include a database, so tasks are cleared upon page refresh. This project was focused on managing state in React components and handling user interactions dynamically. It helped me solidify my understanding of React's state management and UI rendering.

EDUCATION & CERTIFICATIONS

Bachelor in Software Engineering

Virtual University   2022 - Ongoing

ACCP Prime Diploma

Aptech   2020 - 2024
